

Tomahawk roadster owned by Steve and Pam Cameron.
Power comes from a 1996 Chevrolet LT-1 engine mated to a T-56 transmission.

The Tomahawk is a design created by Rory Bateman of northern California. Approximately 30 have been built on Datsun 280Z, 280ZX and 300Z donors.

This one is a fiberglass overlay on a 1978 Datsun 280Z chassis.

Originally this Tomahawk was black.
This photo shows the hard top.
